# Informasjonseksplasjon

Enorm vekst av vitenskapelige publikasjoner i biomedisin - inkludert i odontologi

1. Antallet helsepersonnel og forskere stiger  
og  
Antall publikasjoner er nøkkel til penger og ære
2. Antall publikasjoner fordoblet hvert 10. år
3. Antall tidsskrift øker kontinuerlig

The screenshot shows a web browser window with a list of course providers on the left and a 'smile-on.com' login page in the center. The list includes institutions like 'Academic Curriculum - International' and 'University of Toronto'. The login page has a search bar and a 'Log In' button.

**Hva gjør du hvis ...** 

En 32 år gammel kvinne ringer deg fire timer etter en visdomstannoperasjon og klager over blødning, smerter og hevelse. Hun ønsker umiddelbart smertestillende og antifebril medisin samt antibiotika .... 

---

---

---

---

---

---

---

---

---

---

---

---

**..eller hvis...**

en 66 år gml kvinne oppsøker deg fordi hennes forrige tannlege ikke har klart å hjelpe henne med stadige plager med oral lichen planus. Hun vil gjerne diskutere nyere behandlingsmuligheter hun har lest om i bladet "Kvinner og Klær" med deg...

---

---

---

---

---

---

---

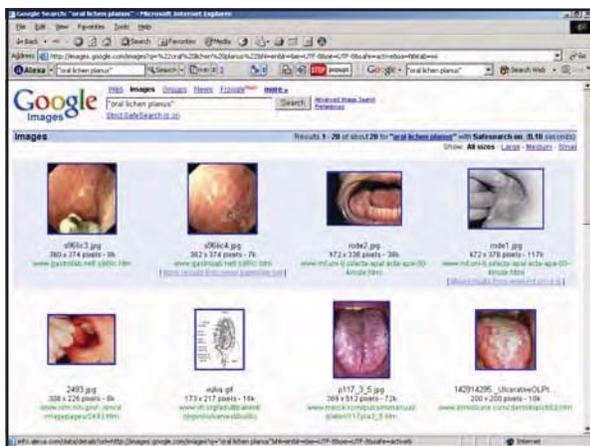

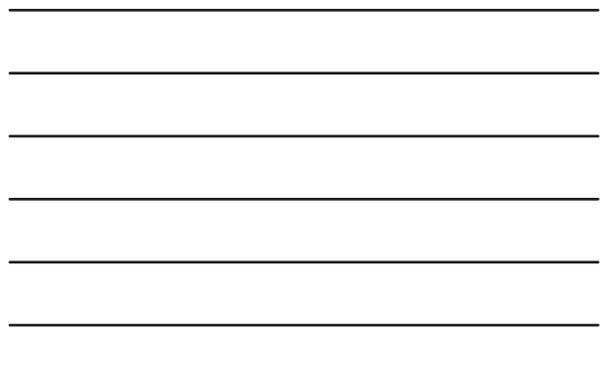

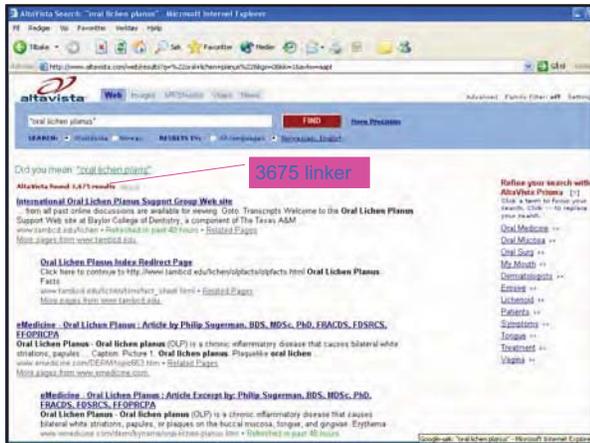

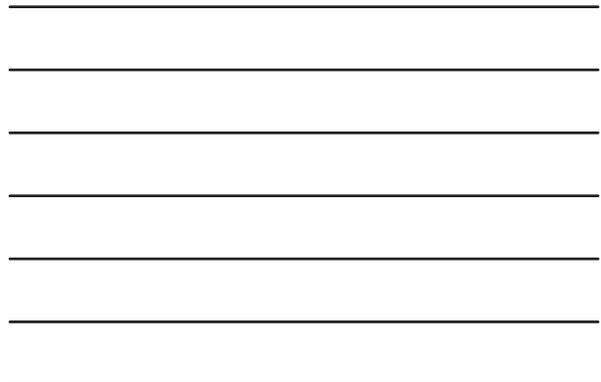

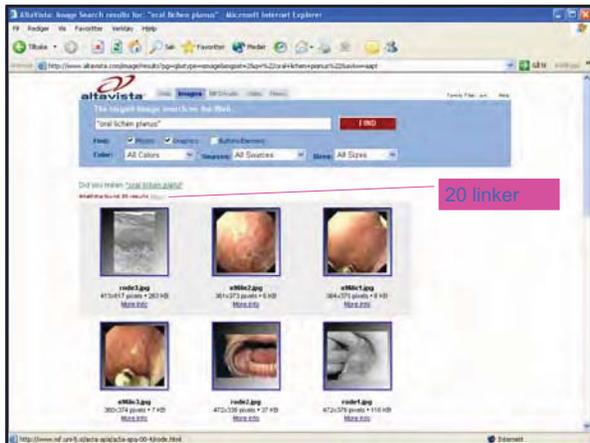

---

---

---

---

---

## Informasjon $\neq$ kunnskap!

- Søkingen blir for uspesifik
  - Det tar for mye tid
  - Kvaliteten varierer
  - Mye "lærebokpreg" på det som finnes
  - Vanskelig å finne svar på konkrete problem
  - Husker ikke hvordan man søker
  - MEDLINE indekserer ca. 4000 tidsskrift; en distinkt minoritet
  - Får ikke tak i originalartikkelen /lene
  - Har ikke tid til å lese alt i alle tilfeller
- Er dette så bra som det kan få blitt?

---

---

---

---

---

---

---

---

Kanskje kan  
dette nye  
"EBM"  
hjelp meg?

---

---

---

---

## Evidens basert medisin - hensikt

- Hvordan løse daglige kliniske problemstillinger?
  - praktisk spørsmål
- Hvordan være rimelig sikker på at det jeg anbefaler og utfører er det beste pasienten kan motta?
  - etisk spørsmål

---

---

---

---

---

---

---

---

**Evidens basert medisin - metode**

1. Hvordan effektivt finne ny og meningsfull informasjon
2. Hvordan anvende denne nye informasjon

11/21/2004

---

---

---

---

---

---

---

---

**Evidens basert medisin - strategi**

Hvordan vi skal forholde oss til kontinuerlige forandringer . . .

...uten at vi noengang får vite det riktige svaret

11/21/2004

---

---

---

---

---

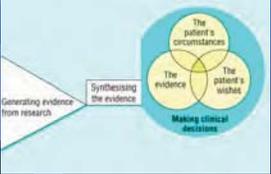

---

---

---

**Hvordan utøve evidens-basert praksis?**

1. Lære selv hvordan evidens-basert odontologi utføres
  - Bøker
  - Seminarer
  - Internett
    - » Online link-lister
    - » Online kurs
    - » Online ressurser

11/21/2004

---

---

---

---

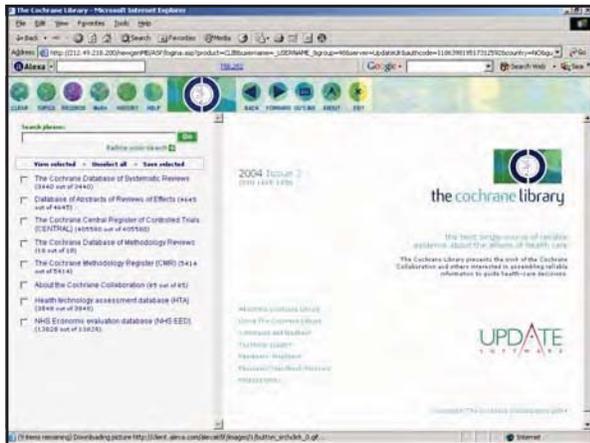

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

## Hvordan utøve evidensbasert praksis?

3. Akseptere og anvende kliniske retningslinjer som er baserte på evidensbaserte prinsipper
